Heisei 31/ Reiwa 1	2019	110	109	5		3	1*			*the category of "commuted" means transfer to another category other than being sentenced to death for reasons such as pardon (see note1 below)	2019 Table 16.
Reiwa 2	2020	109	110	3				4			2020 Table 16.
Reiwa 3	2021	107	109	4		3		3			2021 Table 16.

Note 1: In the Glossary of Terms of “Annual Report of Statistics on Correction (Kyosei-Tokei)”, a “commutation” is defined as “transfer to a category other than death-row convict, on grounds such as pardon”. According to the “Annual Report of Statistics on Rehabilitation” (“保護統計”) of 2019, routine pardons (“常時恩赦”) were not granted to any death-row inmates. Other categories of commutations such as pardons by cabinet order (“政令恩赦”) and pardons by special standards (“特別基準恩赦”) were not available for death row inmates. Accordingly, it may be presumed that the one person who was “commuted” in FY2019 in fact withdrew his appeal against death sentence by trial court and then refuted its validity and effectiveness, and that the report categorised this transfer of status from “death-row convict” to “unsentenced inmate” as a “commutation”. However, in that case, the number of death row inmates at the end of 2019 should be 110, as indicated in this statistics, which is inconsistent with the Minister of Justice’s extraordinary press conference on Thursday, December 26, 2019, where the number of inmates on death row in custody was stated to be 111.
